

Dawit Tegegnwork Wubale

Software Engineer | Healthcare Information Systems | Applied AI

PERSONAL INFORMATION

Address	Bishoftu, Ethiopia
Telephone	+251 939 378 664
Email	dawittegegnwork@gmail.com
Date of birth	15 October 1997
Nationality	Ethiopian

PROFILE

Software engineer with over four years of experience in healthcare information systems and applied AI. Experienced in hospital EMR development, clinical workflow digitization, and AI feature integration in live production environments. Contributed to systems serving more than 6.7 million patients across Ethiopia. Seeking advanced academic training in computer engineering to deepen expertise in software system architecture and intelligent digital platforms.

WORK EXPERIENCE

Sep 2025 – Present

Software Engineer – AI & Healthcare Systems

Orbit Health | Addis Ababa, Ethiopia

- Develop and maintain healthcare software modules and AI-enabled features within a live EMR platform serving over 50 health facilities, 6.7 million registered patients, and 300,000 daily system users.
- Work with structured and unstructured clinical data to support intelligent documentation assistance, workflow automation, and decision-support functions.
- Integrate AI-assisted components into operational healthcare platforms, maintaining system reliability and clinical usability across a network handling 9.5 million medication dispensing records and 2.5 million scheduled appointments.
- Collaborate with the AI integration team on embedding machine learning features into production-grade EMR infrastructure.

Oct 2024 – Aug 2025

Healthcare Software Developer (Freelance)

iMedary – Healthcare Technology Company | Remote

- Customized hospital software modules for patient flow management, medical records, and administrative workflows for smaller private facilities with constrained operational environments.
- Supported integration and remote implementation of healthcare platforms across distributed teams.
- Adapted software solutions to meet the specific deployment constraints of each facility.

Sep 2021 – Sep 2024

Software Developer – Healthcare Information Systems

Defence Specialized Referral Hospital | Addis Ababa, Ethiopia

- Contributed to a three-year project to design and build a hospital-wide electronic medical records system from scratch, moving approximately 80% of core hospital processes from paper to digital.
- Developed core modules including patient registration, outpatient clinical documentation, pharmacy management, and laboratory result integration.

- Worked with department heads and senior clinical staff to map real workflows into the system architecture, ensuring the software matched how staff actually worked rather than theoretical assumptions.
- Connected medical equipment interfaces directly to the hospital information system.
- Designed and delivered structured training for high-level users and prepared comprehensive user manuals, workflow guides, and department-specific documentation; reduced staff onboarding time significantly and contributed to training over 5,000 medical professionals across the wider network.

EDUCATION

Sep 2017 – Sep 2021

BSc in Computer Science and Engineering

Adama Science and Technology University | Adama, Ethiopia

- GPA: 3.12 / 4.00
- Final Year Thesis: AI-Based Weed Detection and Precision Spraying System — designed and developed a computer vision pipeline using Python and OpenCV, trained a convolutional neural network on 4,200 labeled field images covering six weed species, and validated the system across four farms over two growing seasons.
- Relevant Coursework: Data Structures and Algorithms, Database Systems, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence, Machine Learning, Computer Vision.

TECHNICAL SKILLS

Programming	Python, Java, C++
AI / Machine Learning	TensorFlow, PyTorch, Scikit-learn, NLP, Computer Vision
Databases	SQL, PostgreSQL
Tools & Platforms	Git, Linux, REST APIs
Healthcare Systems	Bahmni, OpenEMR, OpenELIS
Domain Knowledge	Healthcare information systems, EMR workflows, clinical data management, applied AI in healthcare
